

Figure 1. Map of the study area showing the location of the 10 sampling stations (numbered 1–10) relative to the coastline and the offshore wind farm.

the wind farm. The sampling stations were located at the following distances from the wind farm: station 1 was 10 km offshore, station 2 was 15 km offshore, station 3 was 20 km offshore, station 4 was 25 km offshore, station 5 was 30 km offshore, station 6 was 35 km offshore, station 7 was 40 km offshore, station 8 was 45 km offshore, station 9 was 50 km offshore, and station 10 was 55 km offshore.
